The Manor News

The Manor is still taking applications for their waiting list. The list is not as long as it was, so if you are thinking ahead and would like to be placed on our list please call 754-4101 and we will send you an application form. If you would like a tour of our facility just holler and we'll be happy to show you an apartment and figure what your rental amount would be. We also want to thank all the great people that brought in fresh vegetables and fruit for our residents. It is great to have the fresh goodies in the summer time. So many miss having a garden. Also the residents enjoyed receiving magazines, so if you have any that you can pass on to us, that would be greatly appreciated. Thank you to all of you that have brought in magazines in the past.

Recently the Reedsville High School Freshmen Football Team helped with the Creek Restoration Project. If your organization would like to donate time planting flowers or helping clean and restore the creek to its natural splendor call: 920-901-9417, and thank you.

Special Thanks to the Reedsville High School Freshmen Football Team for their community service helping with the Mud Creek Restoration Project: Ethan Bremer, Dan Hagenow, Luke Delsman, Chris Kimmel, Michael Kocourek, Austin Ebert, Mike Gilsdorf, Mike Haese, Brandon Spatchek, Cody Watzka, Zack Grimm, Ethan Binish, Ken Babcock, Ryan Ebert, Cody Rathsack, DJ Bubolz, Jeff Strouf, Derek Beattie, Sam Willems and coach Aaron Fredrick.

Mud Creek Restoration Project

Some of you may have noticed something different with the creek this year. As suggested by the DNR, in attempt to reintroduce native plant species and restore beauty to the creek shoreline, we are adopting a no mow policy for the creek shoreline and creek bed. This is done to stop creek shoreline erosion thus widening the creek and lowering water levels. It is also done to maintain the wildlife and native plant species in the area. Mowing the shoreline and creek bed only leaves dead debris in the water, promotes soil erosion, and does not let the native water and shoreline plants complete their life cycle to seed and return year after year. We appreciate your patience as it is a process that will take several years to complete, but only a few years to see positive results. For more information, visit the DNR website on creek bed restoration and the benefits it can have on your community.
